

System		Cybersecurity and user rights	
Type of deployment	Centrally managed, multi-server	Kerberos authentication	✓
Licensing	Perpetual	Communication encryption (Recording, Management and Mobile Server)	✓
Number of cameras per recording server	Unrestricted	Restrict user access by client type	✓
Number of recording servers per system	Unrestricted	Dual authorization	✓
Flexible rule engine	✓	Media database encryption and digital signing	✓
Performance and Scalability		Tiered management rights	✓
Centralized management	✓	Two-step verification	✓
Microsoft Active Directory	✓	Monitoring and investigation	
Pre-recording buffer in RAM	✓	Map function	✓
Hardware accelerated video decoding (Quick Sync)	✓	Centralized Search	✓
Edge Storage	✓	Privacy masking	✓
Scalable Video Quality Recording™	✓	Push notification	✓
Hardware accelerated video decoding (NVIDIA)	✓	Alarm Manager	✓
System Monitor	✓	Customer Dashboard	✓
Integration		Manual bookmarking	✓
Third-party application integration	✓	Rule based bookmarking	✓
XProtect Screen Recorder	✓	Smart Map	✓
Metadata	✓	Evidence Lock	✓
XProtect Add ons	✓	Failover and Redundancy	
XProtect Smart Wall	Included	Failover event server	✓
Interoperability		Management failover server	✓
Milestone Interconnect™	Central/ Remote site	Hot- & cold-failover recording server	✓
Milestone Federated Architecture™	Central/ Remote site
